

# VPN Setup

## Note for on-campus users

---

The **UCCSVPN** connects your UCCS or personal computer to the UCCS campus network and therefore only works **off-campus**.

- This allows you to access University resources off-campus such as [Columbia](#), [Z drive \(Faculty/Staff\)](#), [Z drive \(Students\)](#), CU-SIS or HCM, and OnBase.
- If you are on-campus, please note it will not connect over ethernet, UCCS-Wireless, or UCCS-Guest as the VPN is not needed for on-campus connections.
- You can contact the [UCCS OIT Help Desk](#) to confirm the VPN is setup correctly.

## MacOS

## Windows 8.1

## Windows 10
