

# Adding a Signature - Outlook 2016 for Mac

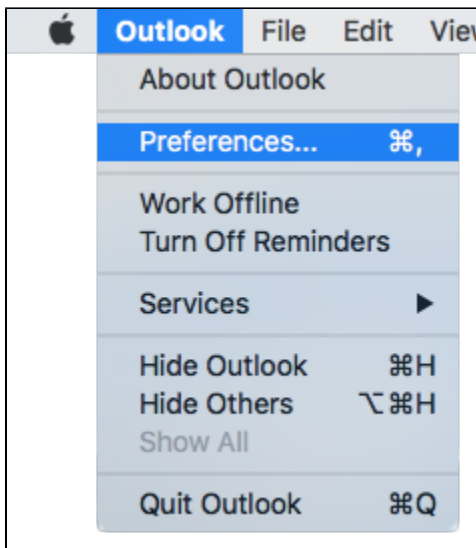

- Step 1: Open Outlook 2016 for Mac
- Step 2: Select Preferences in the Outlook menu
- Step 3: Select Signatures
- Step 4: Add Your Signature
  - Change font
  - Insert Picture
  - Set Default Signature
- Step 8: Close Window to Save

## Step 1: Open Outlook 2016 for Mac

Open **Outlook** from within your Applications folder.

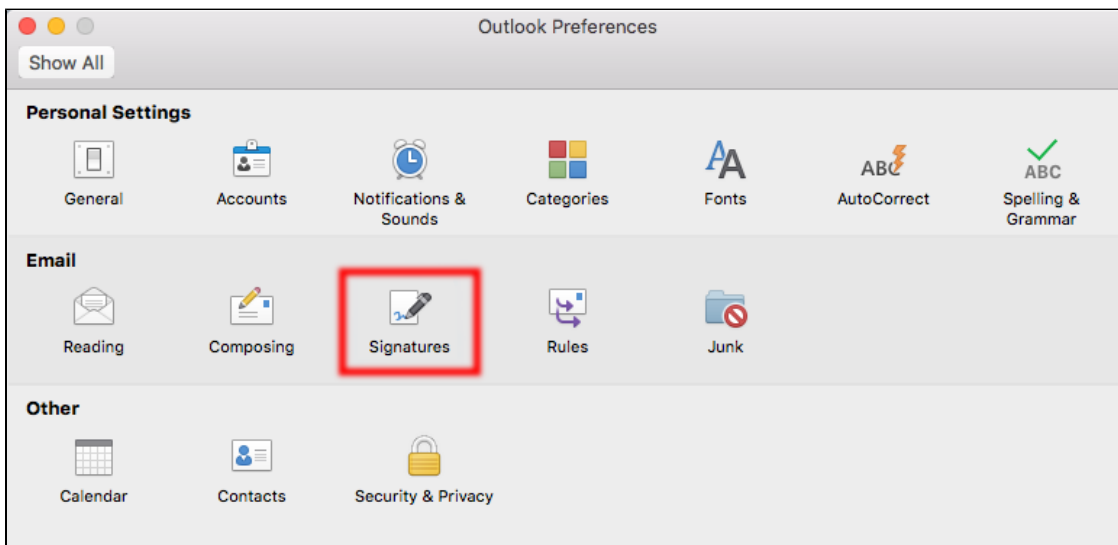

## Step 2: Select Preferences in the Outlook menu

In the top left of your screen **select Outlook** and then **select Preferences...** from the menu.

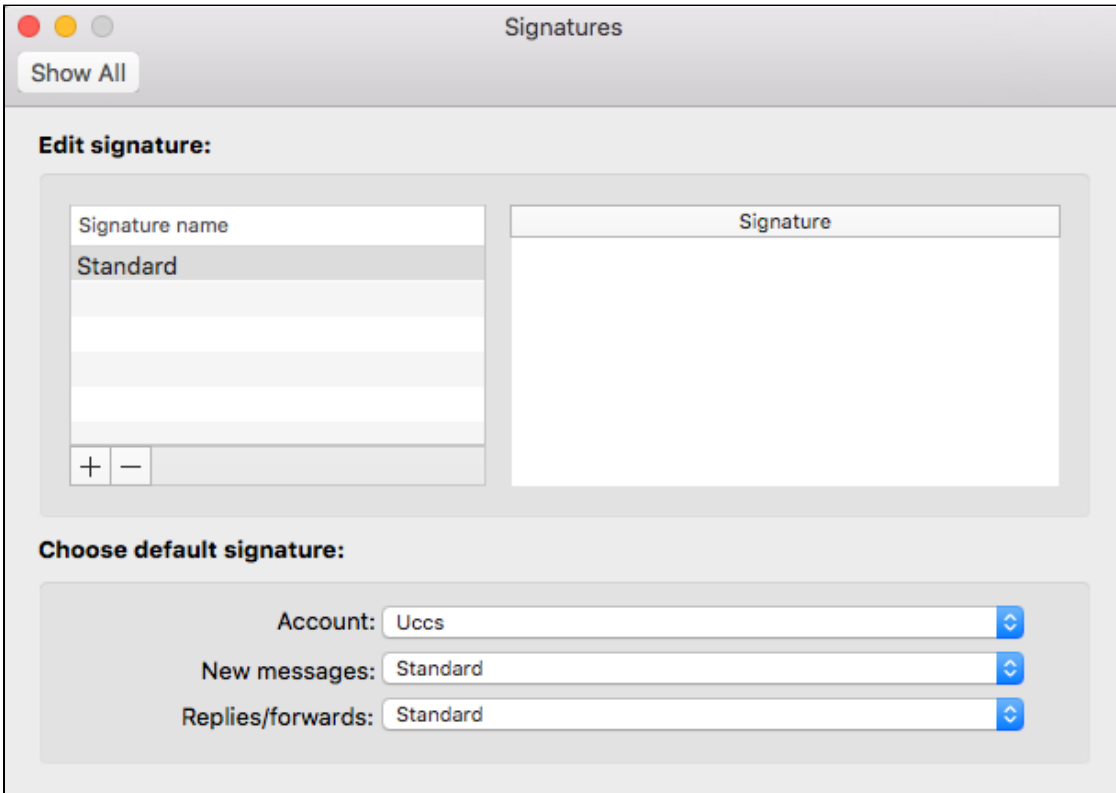

## Step 3: Select Signatures

**Select Signatures** from the Outlook Preferences menu.

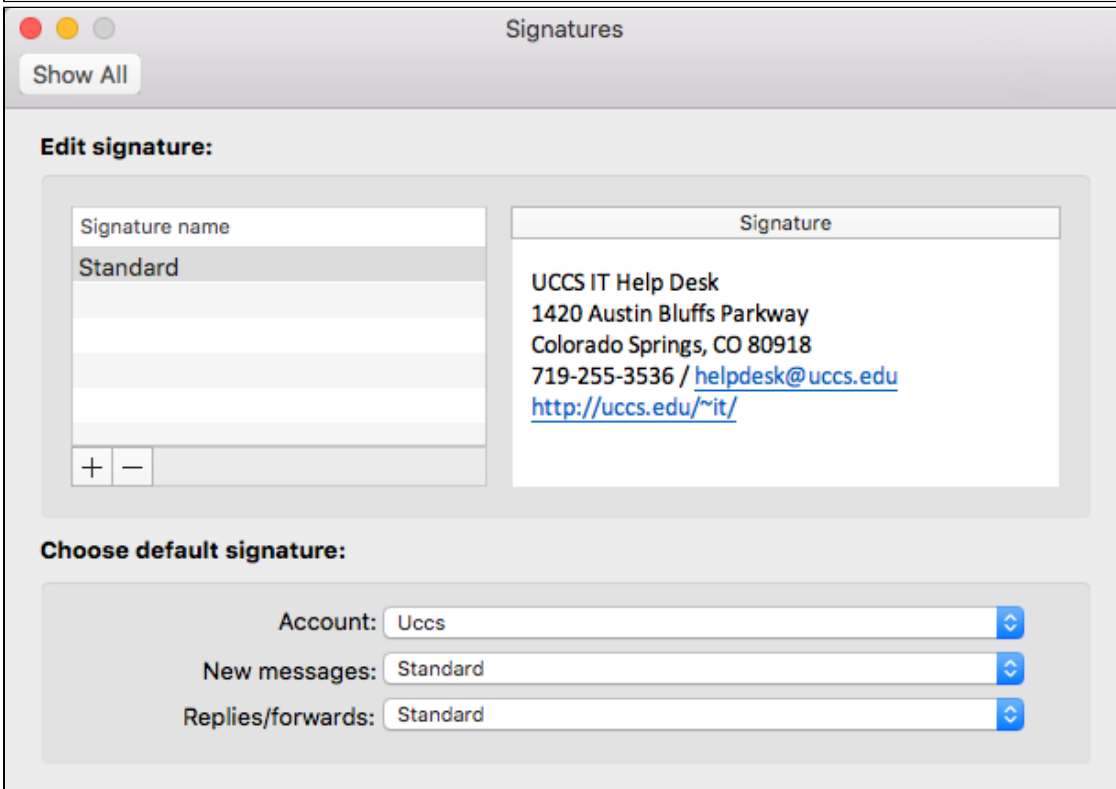

## Step 4: Add Your Signature

Click into the **Signature** box and begin typing your signature.

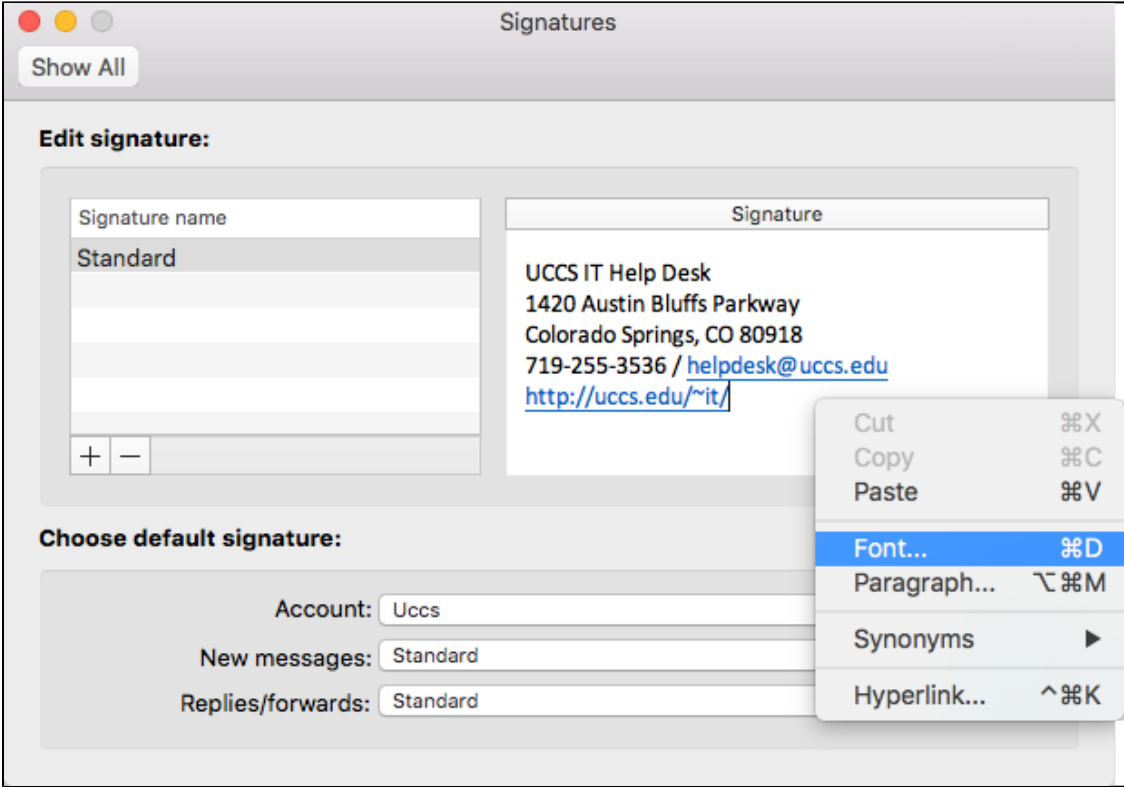

The screenshot shows a window titled "Signatures" with a "Show All" button. Under the heading "Edit signature:", there are two main areas. On the left, a "Signature name" list contains "Standard" and several empty slots, with "+" and "-" buttons at the bottom. On the right, a "Signature" text box is empty. Below these, the "Choose default signature:" section has three dropdown menus: "Account:" set to "Uccs", "New messages:" set to "Standard", and "Replies/forwards:" set to "Standard".

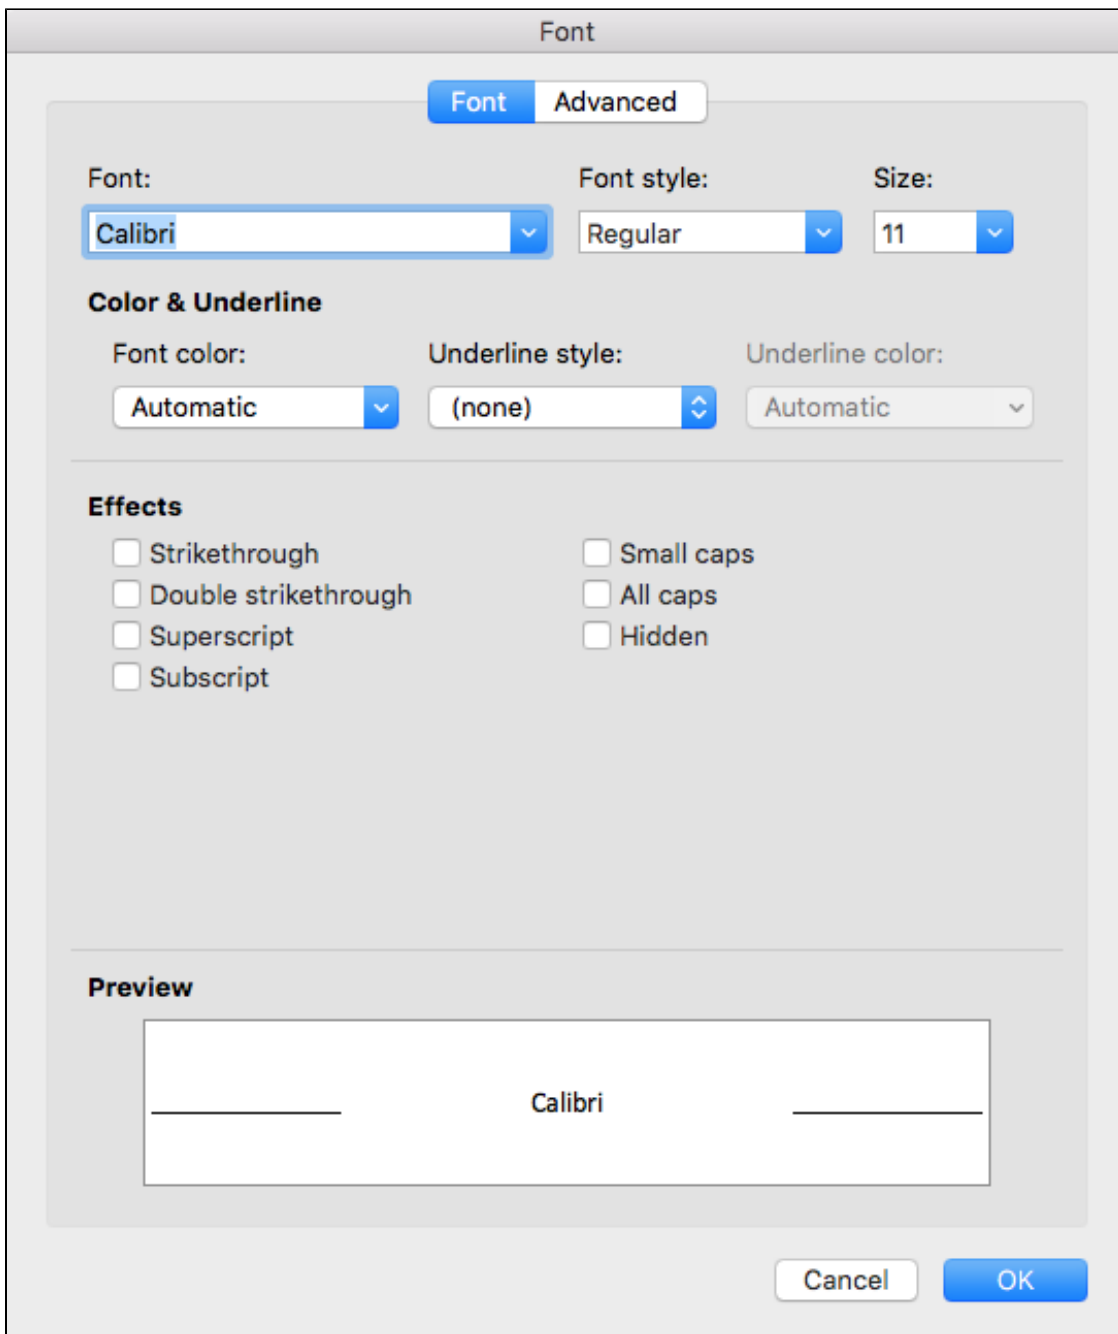

The screenshot shows the same "Signatures" window, but the "Signature" text box now contains the following text:  
UCCS IT Help Desk  
1420 Austin Bluffs Parkway  
Colorado Springs, CO 80918  
719-255-3536 / [helpdesk@uccs.edu](mailto:helpdesk@uccs.edu)  
<http://uccs.edu/~it/>

## Change font

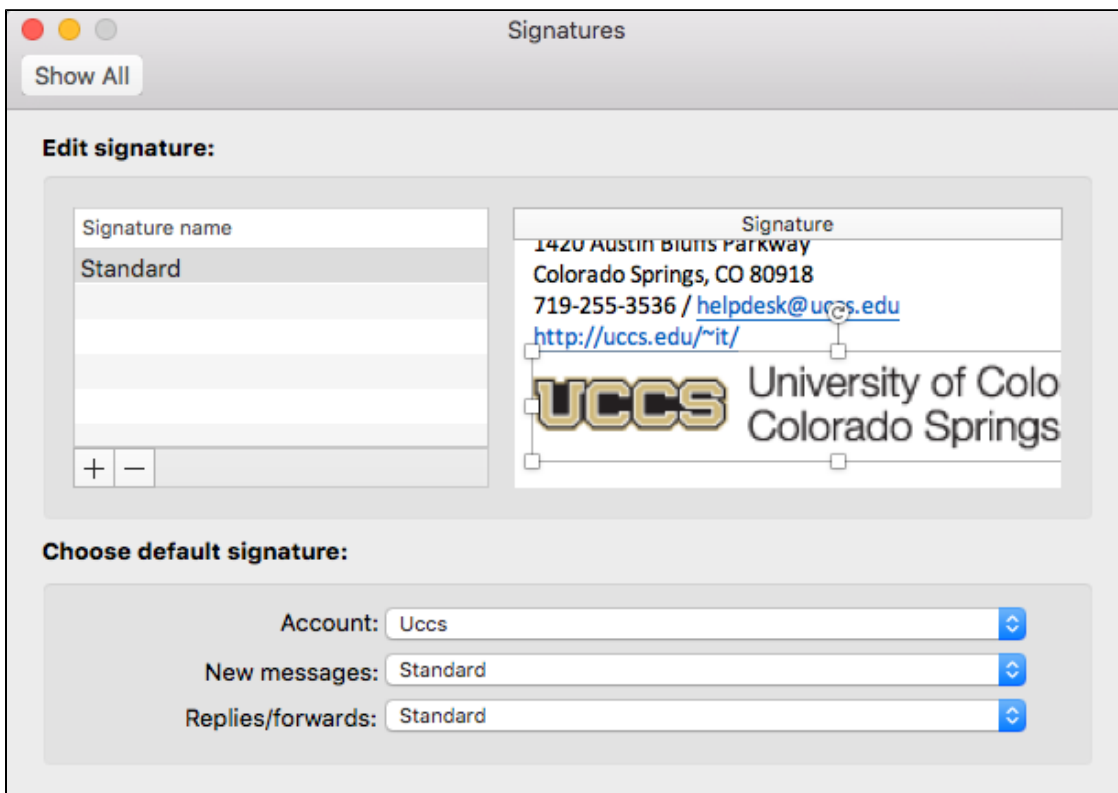

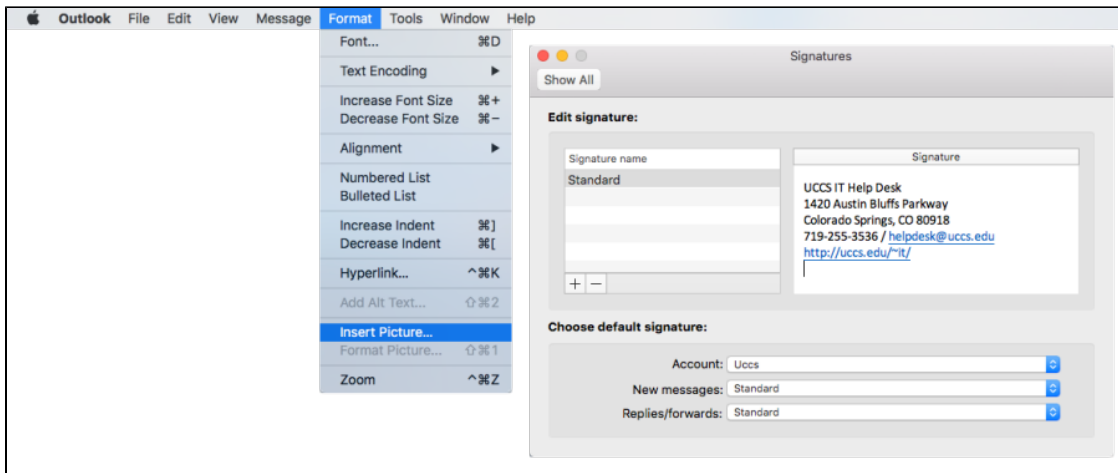

Right-click (or control-click) in the signature box and **select Font...** to change font, color, and size.

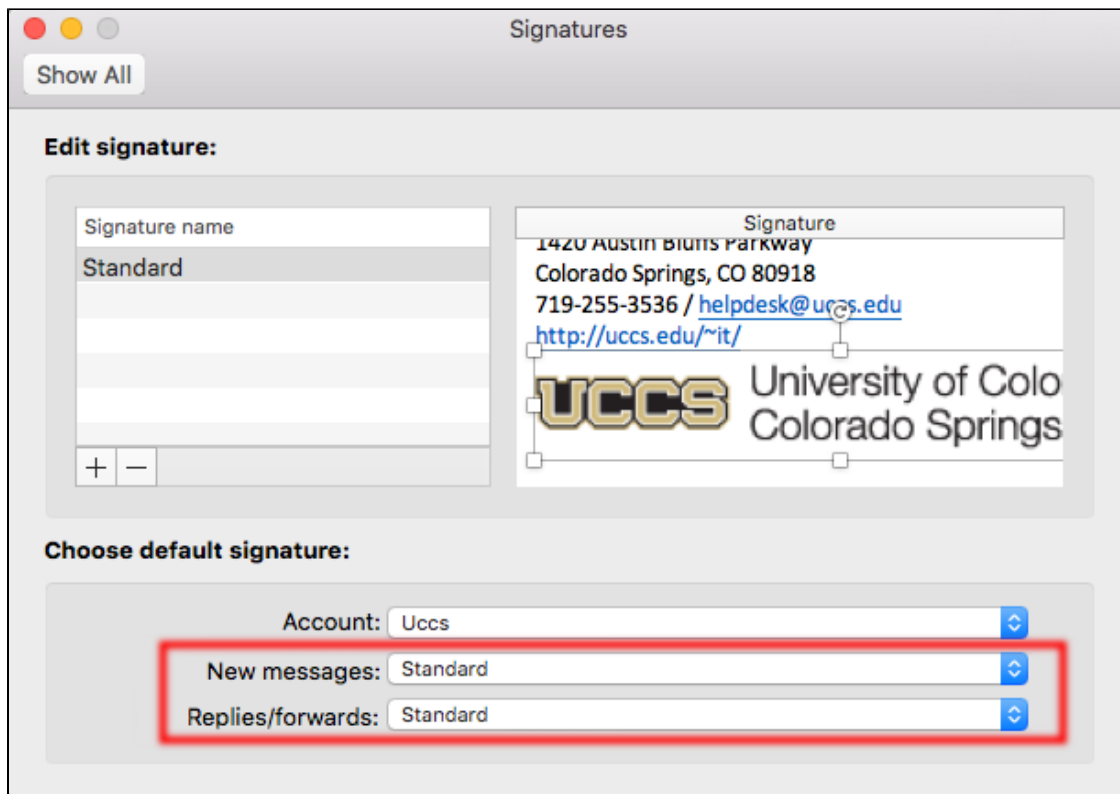

## Insert Picture

Click **Format** in the top menu and select **Insert Picture** to add a picture or logo.

## Set Default Signature

Under **Choose default signature**, make sure your signature is selected under **New Messages** and **Replies/Forwards**.

### Step 8: Close Window to Save

To **save** just close the window. Outlook will automatically save the signature.
